DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to devices responsive with different sensor portions responsive to different wavelengths, classified in class 257, subclass 440.
- II. Claims 2-4, drawn to method of making electromagnetic responsive array, classified in class 438, subclass 73.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, in claim 2, lines 7-9, the "etching away the second layer of multi-layer metallization structure spanning the photosensitive areas with a first etchant that selectively etches the second layer but not the first layer" may be accomplished with lift-off in claim 1.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
